

CH37

Torchless induction heating

Advanced induction technology means there is no open flame - the heat is generated directly in the work piece itself. The high power CH37 Induction Heater can be used as a gas torch but with little risk of damaging nearby components. The CH37 has a unique regulation and control system featuring five power levels, making it nearly impossible to overheat!

Heat shrinking of steel and aluminum panels during repair

Heat rusted nuts and bolts on suspension, steering & exhaust

- **Total control** — high power system quickly heats exactly where the technician chooses
- **Safe** — No open flame, making it safer and more economical than gas
- **Precise** — will not damage nearby heat sensitive parts
- **Versatile** — No preparation required, heats through rubber, plastic, glass, paint, etc.
- **Total power control** — due to the unique regulation- and control system with 5 power levels
- **User-friendly** — easy to read and follow control panel

Controlled heating without a flame

Heats through rubber and plastic

Does not overheat nearby sensitive parts

Powerful heating tool with flexible on/off switch

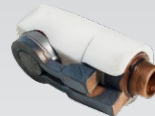

User-friendly front panel with five power control levels

Effective water cooling system with 20-liter tank

Accessories

Angled induction head (standard)

Hightech Fluid 3 ltr

Straight induction head (optional)

Field Amplifier

Technical Data

CH37	Art. No. 36563
Input voltage	208-240V 50-60 Hz, 1P 16A
Protection Class	IP21
Working frequency	18 - 40 kHz
Main Supply Power	4 kW
Induction Power (Maximum)	3.7 kW
Induction cable (length)	3 m
Cooling system	Water (decalcified)
Weight (kg)	34
Water tank	20 liter
