

Plasma Cutter

Accurate, clean,
high speed cutting

Cut through any conductive material in seconds

The Car-O-Liner Plasma Cutter, using inverter technology, guarantees accurate and clean plasma cuts up to 10mm thick and is the perfect cutting tool for all high-strength steels. With excellent cutting performance on thin sheet metal and high wear resistance for increased tool life you will realize greater efficiency in your workshop.

- **Ultimate Portability** — Internal air compressor enables operation in environments where external compressed air is not available.
- **Continuous Output Control**— Focus the arc for different material thickness
- **Fast** — remove damaged parts fast and efficiently
- **Narrow cut line** — no messy working edge

Item	Article No.	Qty.
Plasma Cutter	46553	1
Consisting of		
Power source, supply cable and torch TO400P, complete with grounded cable		
Spare parts		
Electrode E35	46548	10
Diffuser DIF35	46549	2
Conical tips CA35	46550	10
Nozzel box UG35	46551	2
Space box DIS35	46552	4

Technical Data

Input voltage	230V 50 - 60 Hz 1-ph
Absorb power	60%, 3.5 KVA
No-load voltage	350V
Fuse	16A
Current range	5-30A
Cutting current	35%, 30A
Cutting depth on steel class	10 mm
Air pressure	5-5.5 bar
Compressed air capacity	100 l/min
Weight	11 kg
Dimensions (LxWxH)	220 x 400 x 220
Protection Class	IP22
