Comprehensive Training in Aluminum Repair Techniques

In order to meet industry standards and OEM requirements, Car-O-Liner and Alignment Academy have developed a two day course in Cosmetic Aluminium Repair for collision repair technicians. This course covers methods and equipment for cosmetic repair of aluminium panels, using tools such as induction heaters, aluminium spotters and MIG welders.

CM028 Cosmetic Aluminum Repair

Target group:

Collision Damage repair technicians who want to know about working with aluminium repair and develop their welding skills to achieve the best welding results

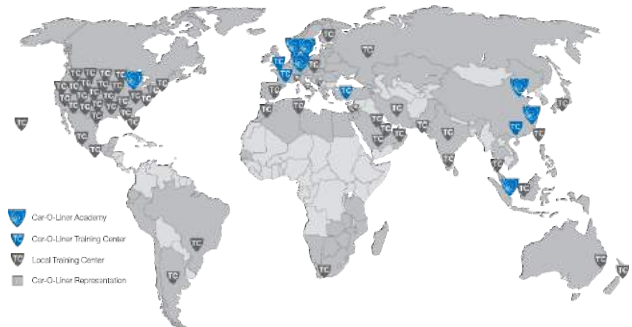

Objectives:

After the completed course the participant should be able to:

- Understand and use methods and equipment for cosmetic repairs on aluminium panels on vehicles in any situation
- Use MIG/MAG welders for aluminium body panels
- Analyse work performed in order to guarantee its quality

Equipment:

MIG/MAG Welders
Induction heaters
PDR equipment
Aluminium Spotters

THE POWER OF KNOWLEDGE

"The use of aluminum in vehicle construction is forcing us to not only develop new means of repairing damaged vehicles, but also to prepare and train repair technicians in the best possible methods for making these repairs" - Thomas Baumann, Director Car-O-Liner Academy

Practical - Conveniently Located

- Over 60 training centers worldwide
- Product and Method training
- For more info see www.car-o-liner.com/training

Proven - Industry Approved

- ASE Certified
- CASE Approved
- I-CAR Industry Training Alliance Member

Powerful - Certified Instructors

Increase your understanding of:

- Electronic Measuring
- Damage Analysis
- Vehicle Clamping
- Welding
- Smart Repair
