

EVO™ 1-2-3

Universal System for Anchoring and Holding

Meet Unique Repair Requirements

EVO is a universal anchoring, holding and fixturing system. Each **EVO** system – 1, 2 and 3 – is made of an optimal number of components to be used alone or combined with one another to securely handle every anchoring, holding and fixturing situation that enters your shop.

These universal kits work for every vehicle year, make and model so you never have to pay traditional fixture costs. There may be a minimum number of components, but together they provide maximum benefit.

Maximize the Benefits of EVO

EVO saves structural repair time with vice-like holding at multiple anchoring locations without additional towers and chains.

EVO is compatible with Car-O-Liner **BenchRack**, **Quick 42** and **Mark 6** and has been approved and recommended by most major Original Equipment Manufacturers for a better repair.

When used with the **Car-O-Tronic Vision2 X3** electronic measuring system you will quickly and easily be guided through the entire fixturing process:

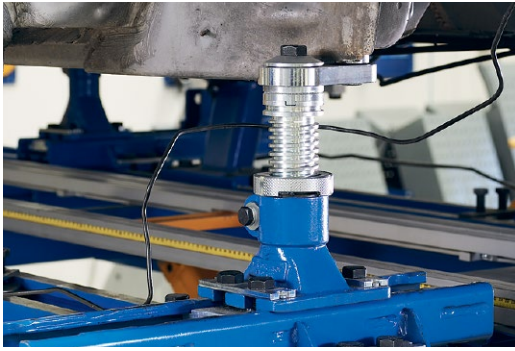

1. Enter the car's VIN code to access measuring and holding data for the vehicle under repair
2. Measure the vehicle
3. Fixture the vehicle following the displayed holding variations recommended as suitable for the alignment procedure.

Hold on to more business! By combining Car-O-Liner benches, measuring equipment and **WorkShop Solutions** inventory management system, you'll have the best solution for rapid results and premium quality from diagnosis and repair to final check and documentation.

- **Approved** and required by many vehicle manufacturers
- **Strong** – vice-like
- **Bolting Clamping or Bracing** – isolate pulling force by holding adjacent areas
- **Universal** – fits any car, van, SUV or light truck on the road, no need to rent or buy extra fixtures
- **Modular** – limited components that, when combined, meet your repair needs
- **Fast** – quick and easy set-up saves time and money Upgradeable – start with EVO 1 and add EVO 2, EVO 3 or other offered combinations
- **Compatible** – works with the Car-O-Tronic Vision2 X3 electronic measuring system and WorkShop Solutions inventory management system

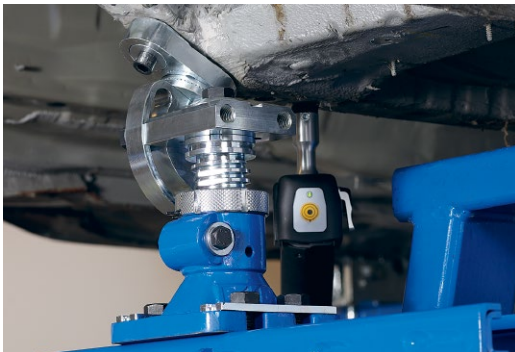

Anchoring and Holding for all your Repair Needs

EVO 1 Basic Anchoring

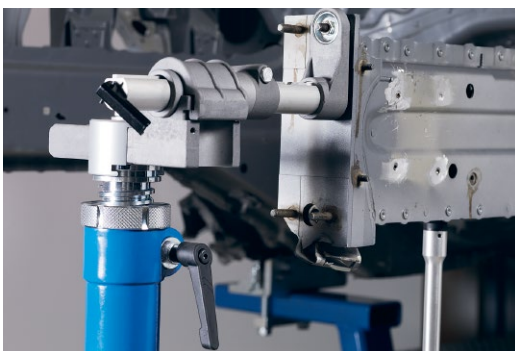

The basic system for anchoring, holding and side support during structural repairs. EVO includes three towers, multi-purpose clamp, track plate, adapter with bushings, chain holder, downpull and torque bar for heavy operations.

Start with EVO 1 and add on to it as needed.

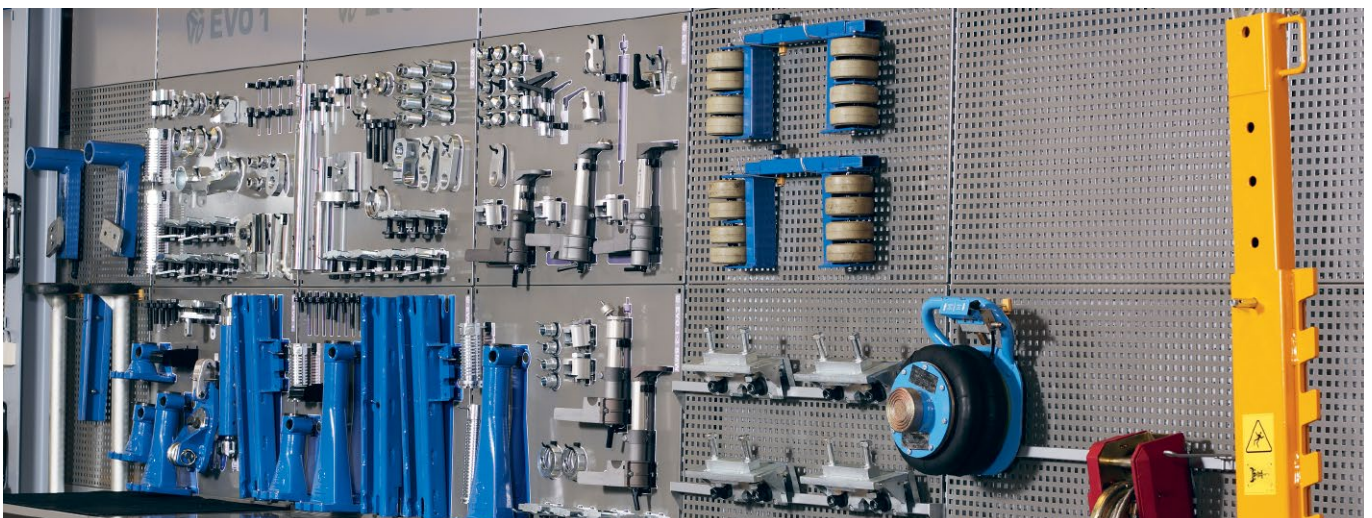

EVO 2 Extended Anchoring

This additional kit for EVO 1 Basic Anchoring provides additional equipment for anchoring, holding and side support during structural repairs. EVO 2 includes two extra towers and track plates, special tools for rear axle bracket, torque bar extensions and adjustable holders, it is the perfect addition to EVO 1 allowing you to more easily tackle advanced repairs.

EVO 3 Holding and Fixturing

EVO 3 is made for building a fixture to hold new body parts in place when welding, bonding or riveting. When combined with EVO 1 and 2, and supported by the **Car-O-Tronic Vision2 X3** electronic measuring system, the equipment works on all vehicle models. EVO 3 includes: adjustable fixture heads, lockable universal joints, lock handle, all-purpose mini-clamp for frame rails, inner fenders and strut towers.

Speed up your workflow! By integrating EVO into the WorkShop Solutions wall you can quickly locate parts.
