

MARK 6™

Flexible Frame Alignment System

Versatility gives productivity

The Mark 6™ bench is designed around the idea that the more flexible a collision repair system is, the more productive it will be. With a series of configurations to choose from, Mark 6 offers flexibility in getting the combination of equipment best suited to your business.

You may also build a system of your own using a tailor-made combination of benches and accessories (all accessories are interchangeable) that fit just your body shop. And you can update your Mark 6 system as your needs grow.

Features and Benefits

- **Universal solution** — for cars, vans, light trucks and SUVs
- **Powerful** — 10-ton draw aligner offers 2800 kgs of lifting capacity and 360° multi-angle pulling
- **Fast** — Drive-on mounting for quick set-up, diagnosis and repair
- **Compatible with EVO 1, 2 & 3** Universal Anchoring and Holding Systems
- **Compatible with the Car-O-Tronic and Car-O-Mech** Measuring Systems
- **Strong** — truck clamping accessories provide strong, no-slip, safe holding
- **Versatile** — interchangeable accessories allow you to build the perfect system for your shop
- **Flexible** — fixed, mobile or pit installations
- **OEM Approved** — secure, quality clamping with specific OEM options

Drive-on capability reduces cycle times

Mark 6 is a mobile bench system with the added convenience of drive-on mounting. Simply roll/drive the car over the lifting platform (minimum height is 200 mm) and you can begin your repair immediately.

Moreover, the vehicle may be quickly raised to the most comfortable height (up to 1362 mm) for each repair operation.

These ergonomic features increase efficiency and offer a productive working environment for the technicians.

ERGONOMIC Approach ramps that can easily be converted into wheel stands, give excellent working conditions.

Mark 6 - a flexible system that delivers solid results

Faster loading and unloading with optional mounting arm that easily clicks in and out

Faster set-up and removal with optional chassis clamp using just two bolts.

Powerful 10-ton Draw-Aligner pulls from almost any angle, 360° around the vehicle.

In-ground installation leaves frame level with floor allowing for easy drive-over and clean shop appearance.

Maximum work space between bench and underside of vehicle with longer bench arms

Technical Data	
Lifting Platform	Mark 6 Base Frame with lift Art. Nr. 34574
Pulling Force (per draw aligner)	10 Ton
Length	4060 mm (160 in)
Width	900 mm (34.5 in)
Max Height	1360 mm (42 in)
Min Height	200 mm (7.9 in) (270 mm top of cylinder)
Max. Length with Draw Aligner	5180 mm
Max. Width with Draw Aligner	2020 mm
Weight w/ Lift	680 kgs (1496 lbs)
Work Area Size (Draw Aligner on both sides)	3140 mm
Mobile Capacity	Yes, Optional
In-Ground Capacity	Yes
Milled surface for measuring	Yes
Hydraulics	
Lift Capacity (Max vehicle weight)	2800 kg (6,160 lbs)
360° Pulling Capacity	Yes
Power	3 Ph, 50 Hz 200, 230, 400 V
	1 Ph, 60 Hz, 110, 220
